(3) The actual damage shall be determined according to the share price on the day of the adoption of the administrative act of the National Bank of Moldova regarding the withdrawal of the banking license and initiation of the process of forced liquidation of the bank (hereinafter - *the date of determination*).

(4) The share price, provided for in paragraph (3) is the price that a potential buyer, having all the substantial information, would have paid on the date of determination, taking into account the bank's prospects and taking into account the bank's real financial situation (including regulatory capital, liquidity and quality of assets), the bank's business model and structure, as well as market circumstances (including access to liquidity and cost of financing) and the macroeconomic situation.

If, according to the audit report, the bank's assets exceed its debts, this shall not necessarily be a sufficient indicator of existence of the patrimonial damage.

(9) If the legislation provides for the application of less prudential requirements, for a short period of time, to stabilize the bank's situation, the bank's compliance with these requirements and non-application of sanctions by the National Bank of Moldova shall not be sufficient evidence of a positive share price value.

(10) In the assessment process provided for in paragraph (5), the following assumptions shall be considered:

a) at the date of determination, the bank must immediately repay any extraordinary public financial support received by it, as well as any emergency liquidity provided by the National Bank of Moldova to the bank, and the financial situation of the bank must be assessed taking into account the financial losses, which the bank would have borne as a result of this repayment;

b) after the date of determination, no liquidity assistance or extraordinary public financial support shall be provided by the public authorities.
